

driving study site performance

Empower and engage study sites with a digital platform that unifies and streamlines key study tasks. TriPort Trial Portal is designed for quick access, intuitive use and controlled workflows, making it easier for study sites to perform clinical trials reliably and consistently.

DASHBOARDS

A consolidated, personalized view of the real-time status of each user's important tasks and activities

METRICS

Visualized display of key data, with filters, drill-downs, and the ability to transform information into action

ADMIN CONTROLS

Comprehensive Admin tools and reports that allow sponsors and CROs to quickly and easily conduct activities across all study sites

ADVANCED TECHNOLOGY

A powerful, scalable and reliable platform, based on state-of-the-art MS Azure IaaS architecture

SUPERIOR COMPLIANCE

Special provisions for security, privacy and quality, complying with all biopharma industry standards

MedPoint Digital partners with biopharma companies and CROs to deploy eClinical solutions that produce unique value. Our goals are to lower costs, improve quality and expedite timelines with digital platforms that transform key areas of clinical operations and study site tasks.

Let us show you how MedPoint delivers innovative technology and remarkable results.

driving study site performance

An Array of Resources in One Platform

Designed to empower study sites and improve performance, TriPort Trial Portal is intuitive to use, enabling sites to complete tasks with reduced effort and improved quality. Sponsors can select the functions they prefer, so every TriPort portal is custom-fit to the needs of each clinical trial.

Training	Online completion of study-specific and standard modules
Documents	Controlled distribution of documents to sites, with e-signatures
Messages	Selectively send alerts or routine messages to study sites
Questions	Sites securely submit questions to sponsors or CRAs, with FAQs
Safety Reports	Rapid, reliable delivery and completion of safety reports [SUSARS]
Visit Guides	A convenient tool to ensure correct conduct of patient visits
Surveys	Collect feasibility assessments, site feedback or other surveys
Site Upload	Sites can upload documents easily and accurately
Study Tools	Quickly access key study reference materials and checklists
Calendars	Track patient visits and key study milestones [coming in 2018]
Community	Leaderboard, blogs, and discussions [coming in 2018]
